Suitable

February 24th, 2025 Release Kit

Table of Contents

Summary of Changes

Suitable

With this release, partners who use NACE Ready can more easily rename their Form groups. Additionally, partners who use the Forms Module can hide certain Forms from the All Forms list. An exciting update for our Hub partners: global student group tagging is here, so now when students are rostered to an organization, a tag is applied to their record in their pathway. Finally, students can download their response to a form. Associated Support Articles are below:

- Hide Forms from All Forms List
- Renaming a Form Group
- Global Student Group Tagging
- Downloading Individual Form Responses

Ability to Hide Forms from All Forms List

- If there is a Form that you do not want available in the All Forms list, you can now hide it under the Form Settings tab.

Hide this form in the main forms list?
This setting does not impact user permissions, it only hides or shows the form to the user on the forms list. If a user has access to the form they will still be able to view and complete it from a direct link, QR code or inside an activity.
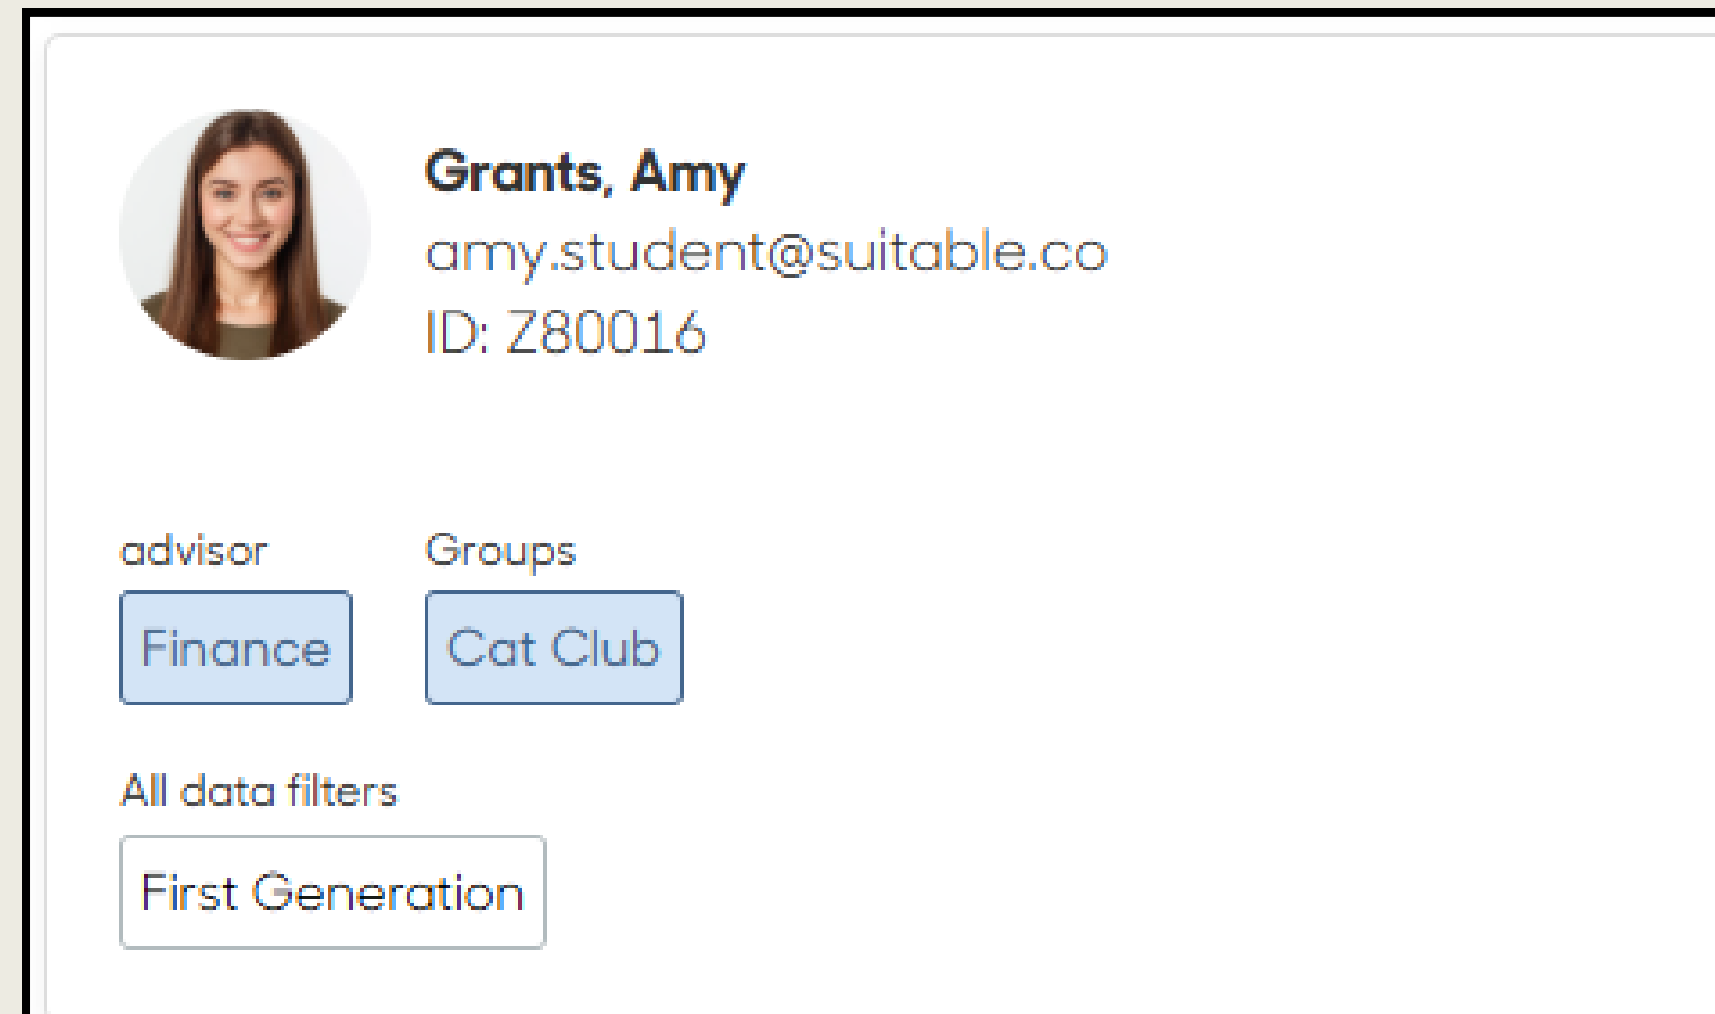

no 🔘 yes

Submission Settings

Suitable

Student Group Global Tagging

- When rostering members of student groups, a tag will automatically be applied to their record in their associated pathway. This tag will also be removed if a student is removed from the group.
- Just roster members to your student groups like usual to see the magic happen!

Renaming Form Groups

- It is now easier to rename Form Groups, adding a setting at the top of the Group to rename it.
For Students: Downloading Individual Form Responses

- Students can now download their responses to a Form, sending the response to their email.
